DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-8, 11, and 12 are rejected under 35 U.S.C. 101 because the claim is directed to neither a “process” nor a “machine”, but rather embraces or overlaps two different statutory classes of invention set forth in 35 U.S.C. 101 which is drafted so as to set forth the classes of invention in the alternative only (see MPEP 2173.05(p)). Claim 1 with the newly added limitations recite the method steps of “forming a first nozzle” and “forming a second nozzle”, which overlap the apparatus statutory of the claim.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-8, 11, and 12 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 combines description of the apparatus with description of method for using the apparatus and violates second paragraph of 35 USC 112 (see MPEP 2173.05(p)). The purpose of that paragraph is to require patentee to provide others with notice of boundaries of protection provided by patent, since manufacturer or seller, at time of making or selling the apparatus set forth in claim, would have no indication whether it might later be sued for contributory infringement if apparatus is used in accordance with claimed method, and since claim is thus not sufficiently precise that possibility of

infringement may be determined with reasonable degree of certainty. Claim 1 having the newly added limitations recite the method steps of “forming a first nozzle” and “forming a second nozzle”, which overstep the apparatus boundary of the claim, the Examiner do not know how to reject the claim since both apparatus features and method steps are claimed in the same claim. Furthermore, the limitation "connecting the central hole" in line 10 should read --connects the central hole--. The limitation “having one or more side slots” in lines 16 and 17 should read --has one or more side slots--. The limitation “having a total area” in line 18 should read --has a total area--. The expression “characterized in” in claims 2-12 should read --wherein--.

Response to Arguments

4. Applicant's arguments filed February 27, 2008 have been fully considered but they are not persuasive in view of the above 35 U.S.C. 101 and 35 U.S.C. 112, second paragraph indicated above.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3752

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
